Summary

Software Developer experienced in shipping full-stack, AI-powered products, across production ML platforms and self-built SaaS apps. Proficient in Python, FastAPI, React, and machine learning. Seeking a software engineering role to build impactful solutions.

Technical Skills

Languages	Python, JavaScript/TypeScript, SQL, Java, C++
AI / GenAI	LLMs, Anthropic Claude API, Google Gemini API, RAG, Prompt Engineering, Agentic & Multi-Agent Systems
Full-Stack & APIs	React.js, Node.js, Express.js, FastAPI, Django, Flask, Streamlit, REST APIs
Cloud & DevOps	Docker, GitHub Actions (CI/CD), GCP Cloud Run, AWS AI/ML, Vercel, Supabase
Data & Databases	Pandas, NumPy, scikit-learn, PostgreSQL, MongoDB, Redis

Professional Experience

Data Science Intern *Apr 2026 – Present*

Amdox Technologies

- Designed and deployed two production-grade full-stack ML/AI platforms (NeuralRetail, MediCare AI) end-to-end – data pipelines, model training, serving REST APIs, and Dockerized deployment.
- Built a decoupled FastAPI backend (<5ms latency via RAM caching) and a 6-page Streamlit BI dashboard for a retail analytics platform processing 500K+ transaction records.
- Enforced CI/CD quality gates with GitHub Actions and Ruff, authored 59 pytest tests (86%+ coverage), and added Prometheus/Sentry monitoring across services.
- Containerized services with Docker Compose and Gunicorn; diagnosed and resolved 8 post-deployment production bugs.

Key Projects

FitBox – AI-Powered Fitness & Nutrition SaaS *React, TypeScript, Supabase, Gemini API*

- Built a full-stack AI product (12 routes, 71 components) with a custom NLP engine powering a conversational AI fitness coach via the Gemini API.
- Shipped a Mifflin-St Jeor nutrition calculator and an interactive SVG muscle-map UI mapping 19 clickable muscle groups to workouts.

Rack & Roll Cafe – Gaming Café Booking SaaS *React 19, FastAPI, MongoDB, Redis, Socket.io*

- Built a real-time multi-activity booking engine (PS5, Pool, Snooker) with live slot-capacity validation and async email confirmations via the Resend API.
- Integrated Google Gemini Flash to generate personalized, AI-powered booking recommendations.

Find Me – Proximity-Based Social Discovery App *React Native, Node.js, PostgreSQL, PostGIS*

- Built a location-based mobile platform with PostGIS geospatial queries, OTP auth, and Socket.io-powered real-time discovery.

Education

Bachelor of Computer Applications (BCA) *Aug 2023 – Expected Aug 2026*

PSIT College of Higher Education (Affiliated to CSJM University)

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Management Systems, Statistics

Certifications

Generative & Agentic AI (Anthropic, 2026) – Claude 101, Claude Code 101, Intro to Claude Cowork, Intro to Subagents, Intro to Agent Skills

Cloud & AI (AWS, 2026) – Fundamentals of Generative AI, Foundations of Prompt Engineering

Leadership

Technical Head, Synergy Club | **Vice President**, IKS Club – PSIT – Built the College Club House Management System, automating registrations for 200+ students across three campus clubs.
